The way developers build has fundamentally changed.

90% of developers regularly use at least one AI coding tool [1]

~$11B Enterprise AI coding agent market – 3x growth in one year [2]

[1] JetBrains (2026 Pulse Survey)
[2] Gartner (May 2026)

The evolution of integration development

1990s–2000s

Manual Code

SOAP, XML, custom scripts

Developers

2000s–2020s

Visual canvas

iPaaS, drag-and-drop

Integration Developers

Now

Natural language

AI agents, prompts

Developers
Integration Developers
Business Users

What's slowing your integration teams down

Growing backlog

More integrations to build, modify, and maintain than developers can ship.

The list grows faster than the team.

Months to ramp

New developers take months to internalize platform conventions before they start contributing.

Expertise lives in people's heads, not in the tools.

Manual configuration

Building the same shapes — connectors, EDI profiles, web services — one click at a time.

The skill is in the design, not the clicks.

Interface friction

Configure in one screen. Deploy in another. Multiple clicks for single, simple changes.

Small changes turn to repetitive grunt work.

Boomi Companion is for the builders of today

AGENTS

Coding Agents

Developers describe what they need in natural language.

- Claude Code / Cowork
- OpenAI Codex
- **Compatible across 40+ tools**

NEW

AGENT SKILL

Boomi Companion

Deep Boomi knowledge packed into portable, open source skills for agents.

- Boomi Platform Expert
- Platform API Calls
- Full Integration Lifecycle Support

TRUST

Boomi Platform

Everything built is visible, governed, and auditable on an enterprise-grade platform.

- #1 iPaaS Platform
- Distributed Runtime
- FedRAMP, SOC ½, ISO 27001

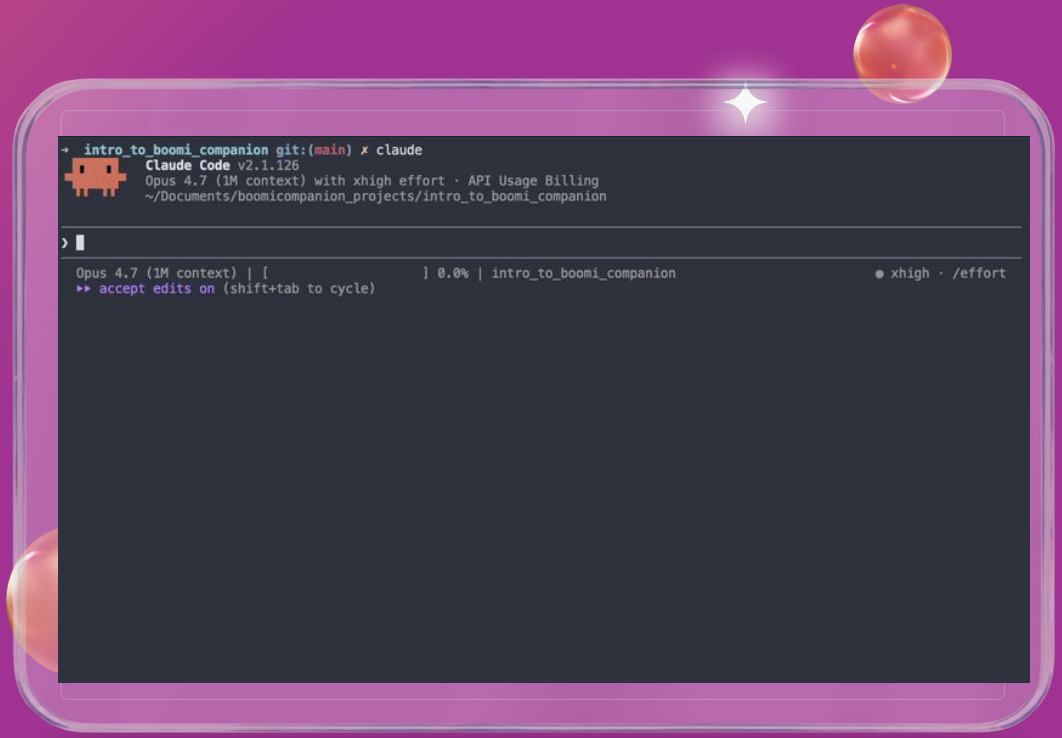
Copyright © 2026 Boomi, LP or its affiliates. All rights reserved.

INTRODUCING

Boomi Companion

Enable existing AI tools to design, build, test, deploy & diagnose Boomi integrations in natural language

- Accelerate Boomi development with best practices automatically applied
- Transform prompts into integrations in any language the AI agent supports
- Refine every component with human-in-the-loop oversight



AI-assisted development for Claude Code, Codex & more via open source Agent Skills standard

Boomi Companion

A Continuous, Conversational Development Cycle

01 Describe

Tell Companion what you need in natural language. *"Build a Boomi process that maps Account data to my Contact Database."*

02 Build

Companion creates or reuses real Boomi components – connections, maps, logic shapes – against your actual platform instance.

03 Test

Deploy & test – Companion diagnoses test failures and re-tries until everything runs clean, automating the full lifecycle.

04 Refine

Review, adjust, and iterate what Companion builds – in natural language or via UI. No manual rework or context lost to keep the cycle going.

“

With Boomi Companion you showed in 5 minutes more value than we ever thought an integration platform could bring. Boomi will help us stay focused on solving the business problems.

QAD Team
QAD Bangkok

When we first saw Boomi Companion, I went in sceptical. Boomi's platform GPT never quite clicked for seasoned developers. Boomi Companion is different. It actually works.

Richard Hawes
Principal Architect at Atturra

BOOMI COMPANION – COMMON FEEDBACK THEMES

The authentic reception speaks for itself

Speed & time-to-value

"You showed in 5 minutes more value than we ever thought possible."
— Partner

"It's made the idea-to-production life cycle so short, it feels like magic."
— Boomi SC

Legacy iPaaS Migration to Boomi

"Thousands of man-days of migration, compressed into three months."
— Partner

"It rebuilt our legacy integration in Boomi — a genuinely new way to migrate."
— Customer

Just ask – Expertise on Demand

"It's like having a very skilled Boomi developer join the team."
— Customer

"The accelerator that brings our clients into a space they've seen as unattainable"
— Partner

Build with confidence

"Companion provides us with confidence that we deliver & easily cope with any changes."
— Partner

"The most credible attempt at AI for the seasoned integration developer."
— Partner

What is Boomi Companion?

Boomi Companion is a portable suite of open source skills and plugins that give any compatible AI agent deep Boomi Platform expertise.

YOUR AI AGENT

- Claude Code / Cowork
- OpenAI Codex
- GitHub Copilot
- *40+ Other AI Coding Tools*

via agentskills.io

BOOMI COMPANION
The **boomi-integration** skill

- Deep Platform Knowledge
- Best Practices
- Component Lifecycle
- Mapping & Testing
- Package & Deploy
- Diagnose & Iterate

BOOMI PLATFORM
Platform APIs

- Integration
- EDI / B2B
- Event Streams
- Data Hub
- Marketplace

Activate
Boomi expertise, anywhere

Automate
The Integration Lifecycle

Accelerate
Boomi Platform ROI

Build Faster, Day One

Integration Developers
Accelerate building, testing, and iterating on integrations without switching between platform UI, docs, and deployment consoles.

Solution Architects
Design, prototype, and validate integration approaches before committing engineering effort — all from conversation.

Partners
A force multiplier for delivery teams. New consultants ship production-quality integrations from day zero instead of months of ramp.

Citizen Integrators
Non-developers describe what they need in natural language. Companion handles the Boomi platform specifics.

If Claude Code can build anything, why Boomi?

CLAUDE CODE

- **Speed**
  Natural language to working output
- **Conversational**
  Describe it, ship it
- **Iteration**
  Fast prototyping and refinement
- **Multilingual**
  Works in any language

+

BOOMI PLATFORM

- **Orchestration & governance**
  Every component visible, auditable, governed
- **Reusable components**
  Build once, deploy across your org
- **Data Sovereignty**
  Your data stays where you decide it goes
- **Enterprise Security**
  FedRAMP, SOC 1/2, ISO 27001 — built in

The speed of development has changed.

Boomi helps combine speed with control.

AI Coding tools are the engine. **Boomi is what makes it enterprise-ready.**

Key Capabilities

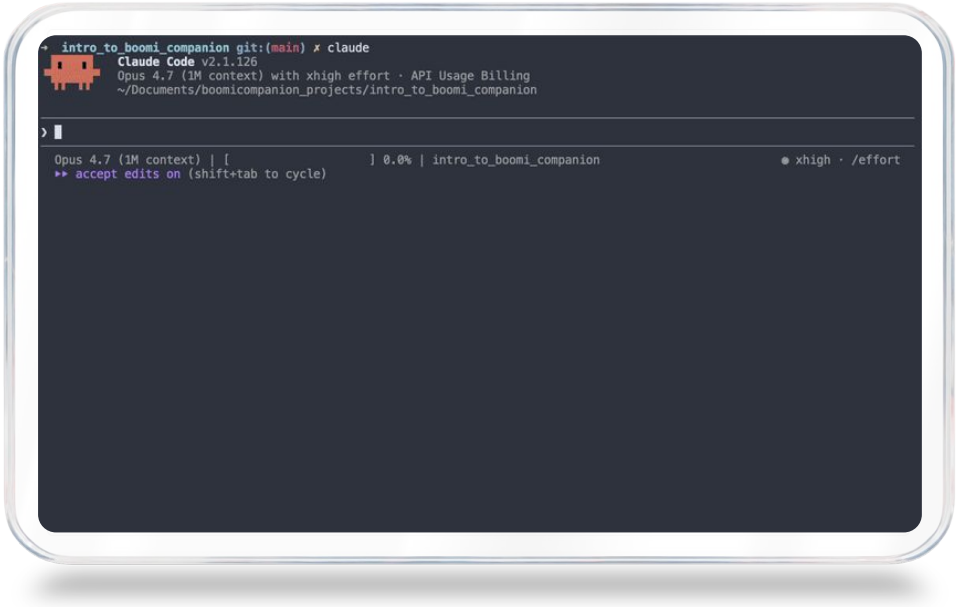
Copyright © 2026 Boomi, LP or its affiliates. All rights reserved.

PROMPT

Accelerate how you use Boomi

Instant Productivity
Companion brings the platform knowledge so new developers deliver *while* training.

Multilingual Conversations
Describe what you need in any language the underlying agent supports – Companion builds it.



Copyright © 2026 Boomi, LP or its affiliates. All rights reserved.

BUILD

Automate the full lifecycle

AI-Assisted Development
Using Boomi best practices, Companion automates the full component lifecycle: build, test, iterate & more

Autonomous Development Loop
Create new processes. Modify existing ones. All through conversation.

Copyright © 2026 Boomi, LP or its affiliates. All rights reserved.

REFINE

Rapidly optimize with full visibility

Enterprise-grade Trust
Every component Companion creates or modifies show up in Boomi, ready for human review.

Autonomous Quality Loop
Automate your testing and iterations, drastically reducing time-to-production.
