

An aerial view of a city skyline at sunset, with a large body of water in the foreground. The sky is filled with dramatic, orange and yellow clouds. Several large, translucent pink bubbles are scattered across the scene, some floating in the air and others appearing to be part of the city's architecture. The text "API Management Recently Released Features Feb 2026" is overlaid in the center in a white, sans-serif font.

API Management Recently Released Features Feb 2026

Unlock Possible

Join us at Boomi World 2026
as we accelerate what's possible
through AI-driven integration,
automation, and intelligence.

Be part of what's next. From breakthrough innovations and bold keynotes to hands-on sessions and dynamic networking, this is where **AI ambition turns into AI action.**

Boomi World 2026

May 11–14, 2026 — Chicago, IL

WHY ATTEND BOOMI WORLD?

Build the Future

See how the **Boomi Enterprise Platform** helps organizations **activate agentic AI** to drive intelligent automation and transformation.

Accelerate What's Possible

Learn from peers and experts who are **connecting data, simplifying complexity, and scaling smarter** across every part of their business.

Connect and Collaborate

Join a **global community of innovators** leading the **next wave of agentic transformation.**

Get Trained and Certified

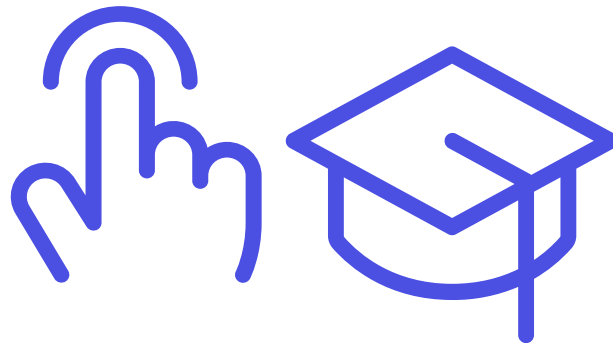

Boost your expertise through **pre-conference training and certification** on key Boomi technologies to stay ahead in a rapidly evolving landscape.

Boomi World is where vision meets velocity and the future starts moving faster.

Upcoming API Management
Features

03

Q/A

Overview: Boomi API Management - Solution Design

Primary Solutions

Boomi APIM Professional Plus

Cloud API Management

- API Registration & Policy Configuration
- Boomi SaaS Cloud Hosted Design Time
- Hybrid API **Traffic Management** Support
 - All API Transactions on Boomi SaaS Cloud
 - All API Transactions On-Premises hosted by Customers
 - Mix of API Transactions on Boomi SaaS Cloud & On-Premises

API Control Plane

- Developer Portal and API Catalog
- Governance and Security Compliance
- API Federation
- API Products
- MCP Bridge

API Gateway

- Locally install a Gateway Runtime
- Connects directly to a Platform Environment
- Offers Policies and a Developer Portal

Masthead 2.0 Service Icons

Integration & Automation

- Integration & Automation
- Integration

Task Automation

Event Streams

Managed File Transfer

B2B/EDI

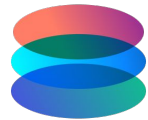

Flow

Boomi Embed

Data Management

- Data Management
- Data Hub

Command Center

Data Integration

API Management

- API Management
- APIM/Gateway

ACP

CAM

AI Management

Boomi AI

Agent

Agentstudio
Agent Garden

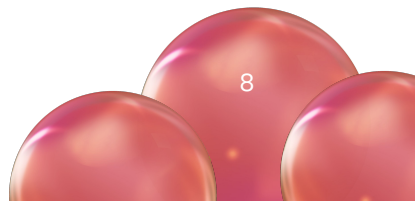

Features

- ACP: Multiple Environments & Register Gateway
- ACP: Merge Applications (Discovery Settings)
- APIM: RBAC Read Only + Support Role
- APIM: Branch Awareness
- APIM: Opentelemetry Settings
- CAM: GraphQL Endpoint
- CAM: Import API Spec from Platform
- Platform: GraphQL API Explorer
- Agentstudio: API Control Plane as Tools

Business Value & Outcomes

- ACP: Multiple Environments & Register Gateway
 - Simplified consolidation of different PROD and DEV Environments under the same account
 - Faster identification of APIs
- ACP: Merge Applications (Discovery Settings)
 - Ability to combine Application names if they respond to the same purpose
 - Simplification of management tasks to avoid confusion when working with Applications
- APIM: RBAC Read Only + Support Role
 - Granular access and permissions for Platform users that are not APIM Managers or Developers
 - Support can view APIM Configurations improving their ability to troubleshoot better and faster
 - Avoids giving Support staff Administrator access
- APIM: Branch Awareness
 - Saves APIM developer time when producing APIs in different branches
 - Better visibility when testing deployed APIs to branches other than main
- APIM Opentelemetry Settings
 - Leverage you preferred Metrics & Monitoring Platform like New Relic, Grafana, Data Dog, etc.
 - Real-time visibility and monitoring of your APIs and Gateways

Business Value & Outcomes

- CAM: GraphQL Endpoint
 - Ability of having a new API Definition for GraphQL Endpoints in addition to REST
 - Enables the API Developer with additional resources to connect to GraphQL resources
- CAM: Import API Spec from Platform
 - API Developer saves times. Instead of importing the API Spec manually, a connection will do this
 - Uses the same CAM design for selecting Endpoints before creating the API Definition
- Platform: GraphQL API Explorer
 - Saves money; you don't need to purchase or install 3rd Party GraphQL IDEs
 - Reduces development time connecting to the Platform; no need to use a JWT Token
- Agentstudio: API Control Plane as Tools
 - Interconnectivity between ACP and Agentstudio eliminating the need for external solutions
 - Leverage Agentstudio and build Agents that can be used to assist with API Operations
 - Start learning why Agentstudio will be the preferred Agent Management Platform (AMP)

Q/A

1. Can we use it as an API-First integration approach as it is used in MuleSoft?
2. How Boomi API Management can cooperate with Azure API Management. What is Boomi's recommendation?
3. How Agentstudio will be used to create API Management solutions?
4. Been a customer of APIM for 3+ years However, our true usage of it pretty much stays static. What would you recommend we investigate that we might have missed?
5. What is the actual reach of AgentStudio for creating API Management solutions?
6. How to use API Control Plane to manage API services and API gateways?
7. How do we work with the new features?

Q/A

1. On-prem Runtime availability?
2. What can I do with the Boomi MCP Server?
3. Provide the Scenario-based and Use cases for better understanding.
4. Do I still need API Management if all the Integrations are for internal systems? No external consumers. And we don't really have a need for throttling, auth, or versioning, etc. We are a small company.
5. I want to know more about Geospatial API integrations.
6. Just wanting general overview, but particularly interested in AgentStudio for generating APIs.
7. Understand APIM features. How Boomi is different from other APIM platforms?

Recap

- Upcoming APIM Features for:
 - API Gateway
 - Cloud API Management
 - API Control Plane
- More Features coming in March

Community Online Learning & Certification - <https://train.boomi.com>

- New to Boomi? Start with the **API Management Path**
- Professional API Design ★
- Professional API Management ★
- Then you can take:
 - API Control Plane
 - Cloud API Management
 - Any of our Advanced Short Courses
