

An aerial view of a city skyline at sunset, with a large body of water in the foreground. The sky is filled with dramatic, orange and yellow clouds. Several large, translucent pink bubbles are scattered across the scene, floating above the buildings. The text "API Management at Scale" is overlaid in the center in a white, sans-serif font.

Join us at Boomi World 2026  
as we accelerate what's possible  
through AI-driven integration,  
automation, and intelligence.

**Be part of what's next.** From breakthrough innovations and bold keynotes to hands-on sessions and dynamic networking, this is where **AI ambition turns into AI action.**

# Boomi World 2026

May 11-14, 2026 — Chicago, IL

WHY ATTEND BOOMI WORLD?

## **Build the Future**

See how the **Boomi Enterprise Platform** helps organizations **activate agentic AI** to drive intelligent automation and transformation.

## **Accelerate What's Possible**

Learn from peers and experts who are **connecting data, simplifying complexity, and scaling smarter** across every part of their business.

## **Connect and Collaborate**

Join a **global community of innovators** leading the **next wave of agentic transformation.**

## **Get Trained and Certified**

Boost your expertise through **pre-conference training and certification** on key Boomi technologies to stay ahead in a rapidly evolving landscape.

**Boomi World is where vision meets velocity and the future starts moving faster.**

[Register Today at BoomiWorld.com](https://BoomiWorld.com)

**Join us at Boomi World Tour Sydney 2026  
as we accelerate what's possible through  
AI-driven integration, automation, and  
intelligence.**

**Be part of what's next.** Gain executive-level insight into Boomi's platform roadmap, AI-driven innovation, and how to activate data across the enterprise — through data readiness, integration and automation, and agent management.

**boomi** **WORLD**  
**TOUR 2026**

1 – 2 September 2026, Sydney

WHY ATTEND BOOMI WORLD TOUR SYDNEY?

### **Expert Perspectives**

Hear directly from Boomi executives, technologists, customers, and innovators about driving measurable outcomes.

### **Learn From Customer Successes**

Be inspired by real-world customer stories showcasing their agentic transformation journey with Boomi.

### **Network With Peers**

Connect with industry peers and exchange perspectives, challenges, and strategies for scale

### **Become AI-Ready**

Discover how to activate your data, develop the expertise to guide your AI strategy, accelerate modernization, and build intelligent integrations—so you can be fully AI-ready.

**Boomi World Tour Sydney is where visions  
meets velocity and the future starts moving  
faster.**

# Boomi named a Leader in IDC MarketScape for API Management

## IDC MarketScape API Management 2026

“Consider Boomi when an organization wants to combine integration-led modernization with structured API management in a single, cloud-based platform. Boomi is particularly relevant when existing or planned integration flows need to be exposed as well-governed APIs and when the same platform is expected to support event-driven patterns and automation spanning on-premises and cloud applications.”

IDC MarketScape: Worldwide API Management 2026 Vendor Assessment, Doc #US52034025

IDC MarketScape vendor analysis model is designed to provide an overview of the competitive fitness of technology and suppliers in a given market. The research methodology utilizes a rigorous scoring methodology based on both qualitative and quantitative criteria that results in a single graphical illustration of each supplier's position within a given market. The Capabilities score measures supplier product, go-to-market and business execution in the short-term. The Strategy score measures alignment of supplier strategies with customer requirements in a 3-5-year timeframe. Supplier market share is represented by the size of the icons.

# Boomi named a Leader in API Management

## Gartner® Magic Quadrant™ for API Management - 2025

“Leaders are vendors that execute strongly, leading and influencing the market. Leaders tend to have a vision and a market understanding to address diverse API use cases, multiexperience architecture, integration using APIs, internal API management, productizing APIs, and distributed API management.”

Gartner® Magic Quadrant™ for API Management, Shameen Pillai, John Santoro, Steve Schwent, Nicholas Carter, October 7, 2025.

# Accelerating API Lifecycle Management

# AI-Accelerated Design, Documentation, and Build

## Benefits

- Generate high-quality API specifications from goals, consumer personas, and optional technical elements
- Generate business and technical documentation from API definitions
- Generate API Service with operations, input/output profiles, and process stubs
- Supercharge subject matter experts by automating repetitive tasks
- Accelerate time-to-market to deliver new innovation at the speed of business

The image displays the API Control Plane interface, which is used for generating and managing API specifications. The main view shows the 'Generate OpenAPI Specification' process for a 'Member Management API'. The interface includes a sidebar with navigation options like Home, APIs, API Products, Governance, Environments, Applications, and Configuration. The main content area contains form fields for 'Display Name', 'Status', 'Active' (toggle), 'Owner', 'API Purpose', and 'API Consumers'. Below these are 'Optional Technical Context' buttons and 'API Key Fields'. A 'Create New Documentation' modal is open, allowing users to specify a 'Documentation Name' (e.g., 'Member Management Business Value'), choose a 'Documentation Type' (Markdown or Rich Text), and select a 'Welcome Page' (e.g., 'Use as Welcome Page of API in Developer Portal'). The modal also has options for 'Documentation with AI' (Enabled) and a 'Create' button.

The bottom part of the screenshot shows the 'Member Management API' overview page. It includes a 'Send to Boomi Integration' button and a 'Version: default' section. The 'API Specification' section shows a 'Quality Score (100/100)' and 'Security Score (100/100)', with a message stating 'No Quality issues found!'.

# Seamless API Service Import, Management, and Governance

## Benefits

- Import API Services directly from Boomi Integration
- Auto-configure endpoints and last mile connectivity
- API Control Plane agentless discovery from Cloud API Management
- End-to-end API management with zero infrastructure to manage

The image displays two overlapping screenshots of the Boomi API management interface. The top screenshot shows the 'Cloud API Management' dashboard with a navigation bar (Analyze, Manage, Design, Deploy) and a main section titled 'Manage your APIs with API Definitions'. It features a 'New API Definition' button and summary statistics: 8 API Definitions, 36 Endpoint Definitions, and 13 Method Definitions. A modal window titled 'Import from Boomi Platform' is open, showing 'Step 1/2: Select an API to Import'. The modal includes a search bar and a table with columns for API Name, Existing Version, Latest Version, Environment, and Gateway. A row for 'Inventory Managem...' is visible with version 1.0.0 and environment 'BeerDemo', marked as 'Configured'.

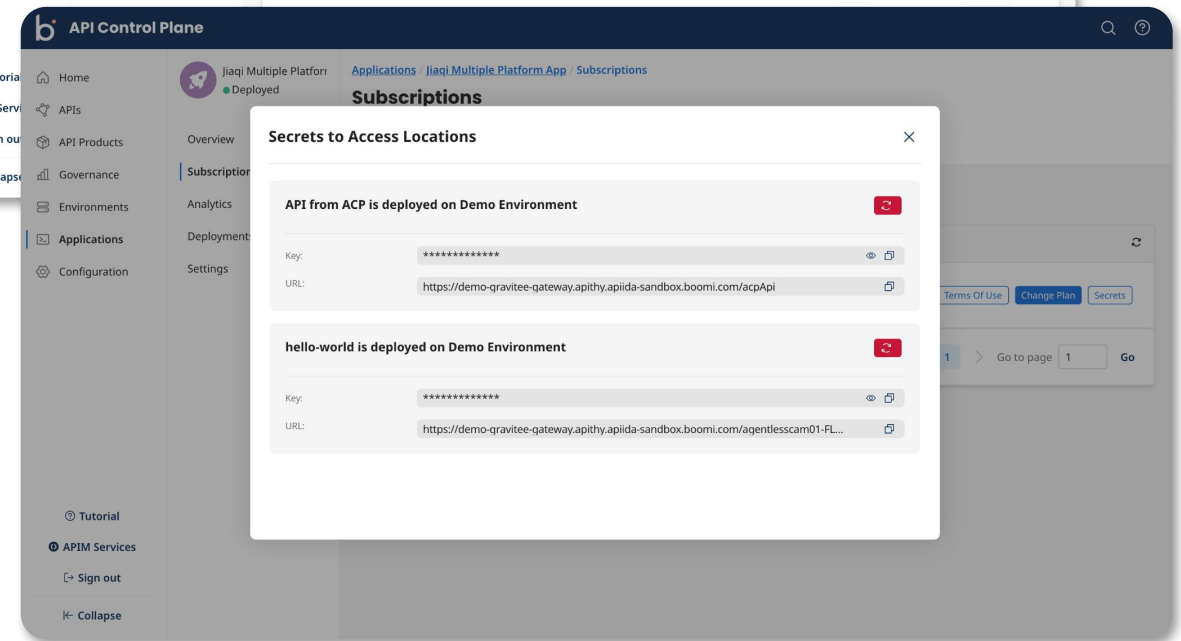

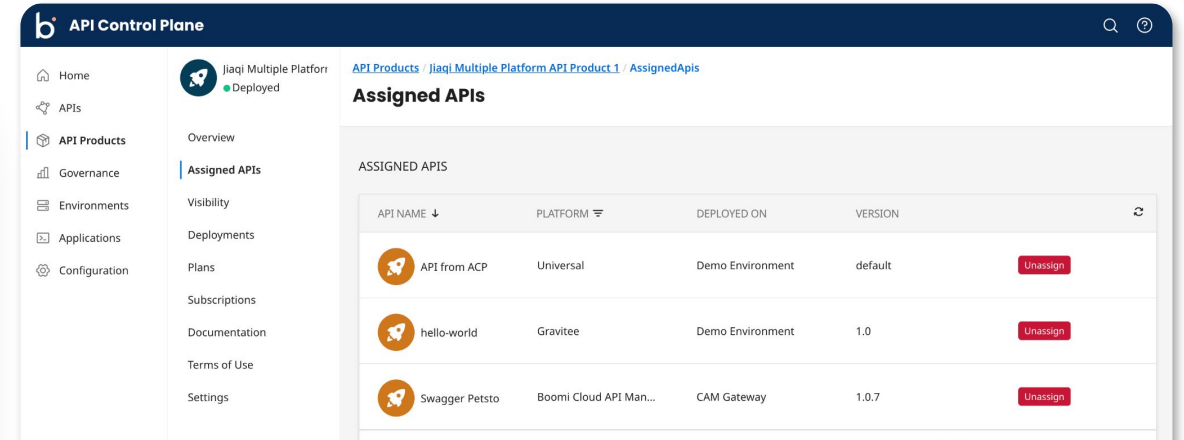

The bottom screenshot shows the 'API Control Plane' interface. It features a 'BoomiAPIM' status indicator (Connected) and a sidebar with navigation options: Overview, Deployments, Access Management, and Settings. The main area displays an 'Overview' section with 'Discover' and 'Reload Agent Status' buttons. Below this is a table of APIs:

NAME	VERSION	ID ON GATEWAY
Supply Management	1.0	unv8673ey3bz5szg
Starlight Retail Product Catalog	4.0.0	qaekztmzqd5urx4t
Shoping Cart Service	1.0	vgvpz8xp5ptttxet2b

# Multi-Platform API Products

## Benefits

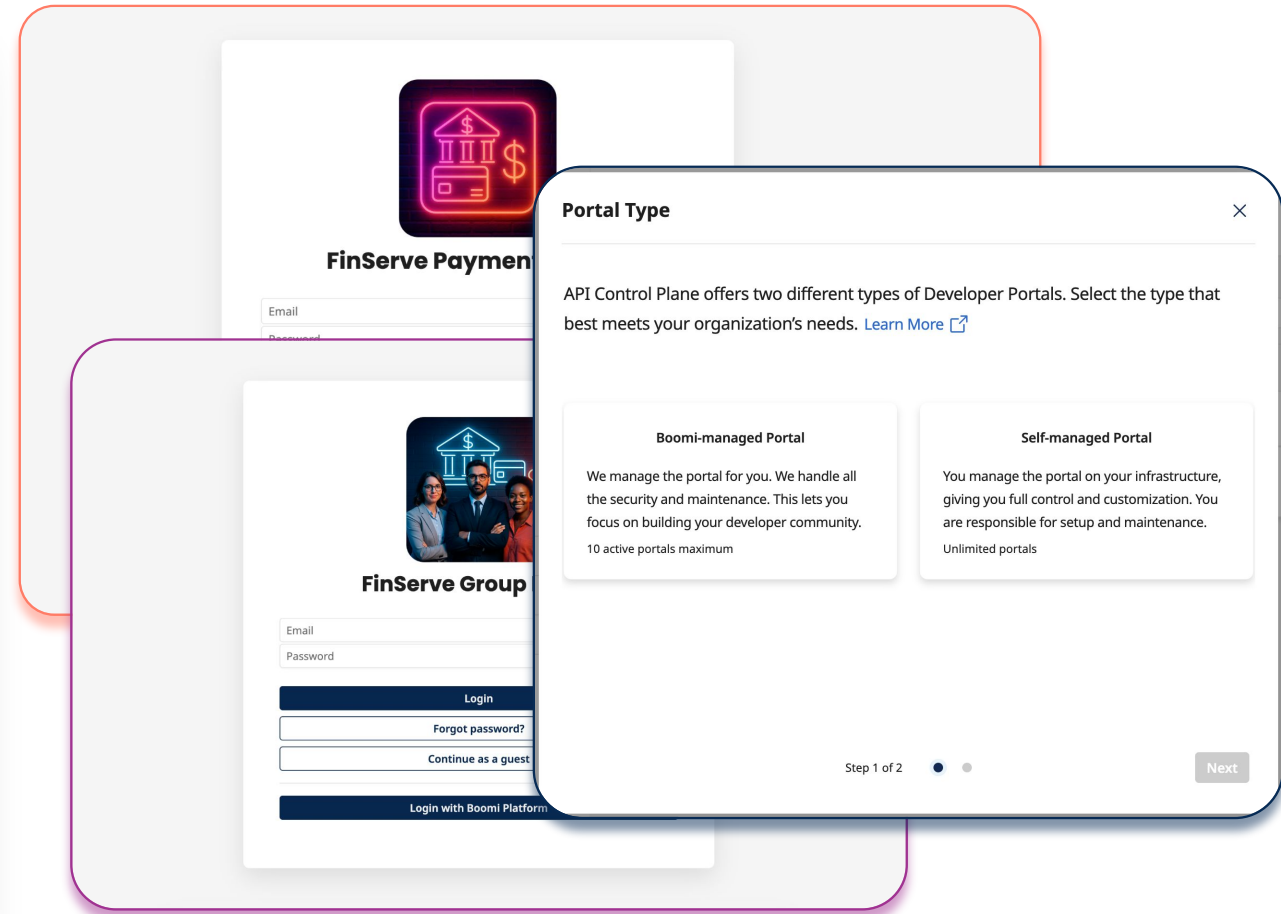

- Create unified API products that combine APIs from multiple gateways into a single, cohesive offering
- Simplify API discovery and consumption for developers with a unified Developer Portal experience
- Support for multiple environments on one Boomi API Gateway
- Flexible management of prod and non-prod services

# Multiple SaaS Developer Portals

## Benefits

- Serve distinct audiences without self-hosted complexity
- Create up to 10 new developer portals with one click
- Address diverse use cases, including partner portals, API portals, and AI tool portals
- Customize look and feel per portal to match audience expectations

# Code Generation in “Try it Out”

## Benefits

- Generate ready-to-use client code snippets directly from the Swagger UI in multiple languages
- Eliminate repetitive boilerplate work so developers can focus on business logic instead of wiring code
- Accelerate API adoption with the native Developer Portal experience
- Copy code snippets instantly for use in any application

The screenshot displays the Swagger UI interface for the 'boomi' API. The left sidebar contains navigation links: Home, APIs, API Products, Applications, and Users. The main content area shows the 'Inventory and Availability' endpoint with the following parameters:

- `supports_bopis` (boolean): If true, only return locations that support buy-online-pick-up-in-store.
- `latitude` (number): Latitude for proximity-based sorting. Requires longitude. Value: 40.7128
- `longitude` (number): Longitude for proximity-based sorting. Requires latitude. Value: -74.006
- `radius_km` (number): Maximum distance in kilometers from the provided coordinates. Default 50. Value: 50

Below the parameters are 'Execute' and 'Clear' buttons. A 'Snippets' dropdown is open, showing a Node.js code snippet:

```
const http = require('https');

const options = {
  method: 'GET',
  hostname: 'boomimarienamuller.api.mashery.com',
  port: null,
  path: '/inventory/v1/locations?latitude=40.7128&longitude=-74.006&radius_km=50',
  headers: {
    accept: 'applic
  }
};

const req = http.request(options, function (res) {
  const chunks = [];

  res.on('data', function (chunk) {
    chunks.push(chunk);
  });

  res.on('end', function () {
    const body = Buffer.concat(chunks);
    console.log(body.toString());
  });
});
```

The 'Request URL' field at the bottom shows the full URL: `https://boomimarienamuller.api.mashery.com/inventory/v1/locations?latitude=40.7128&longitude=-74.006&radius_km=50`

# Boomi API Management

## Frictionless Governance & Operational Scale

# Geographical Distribution

## Benefits

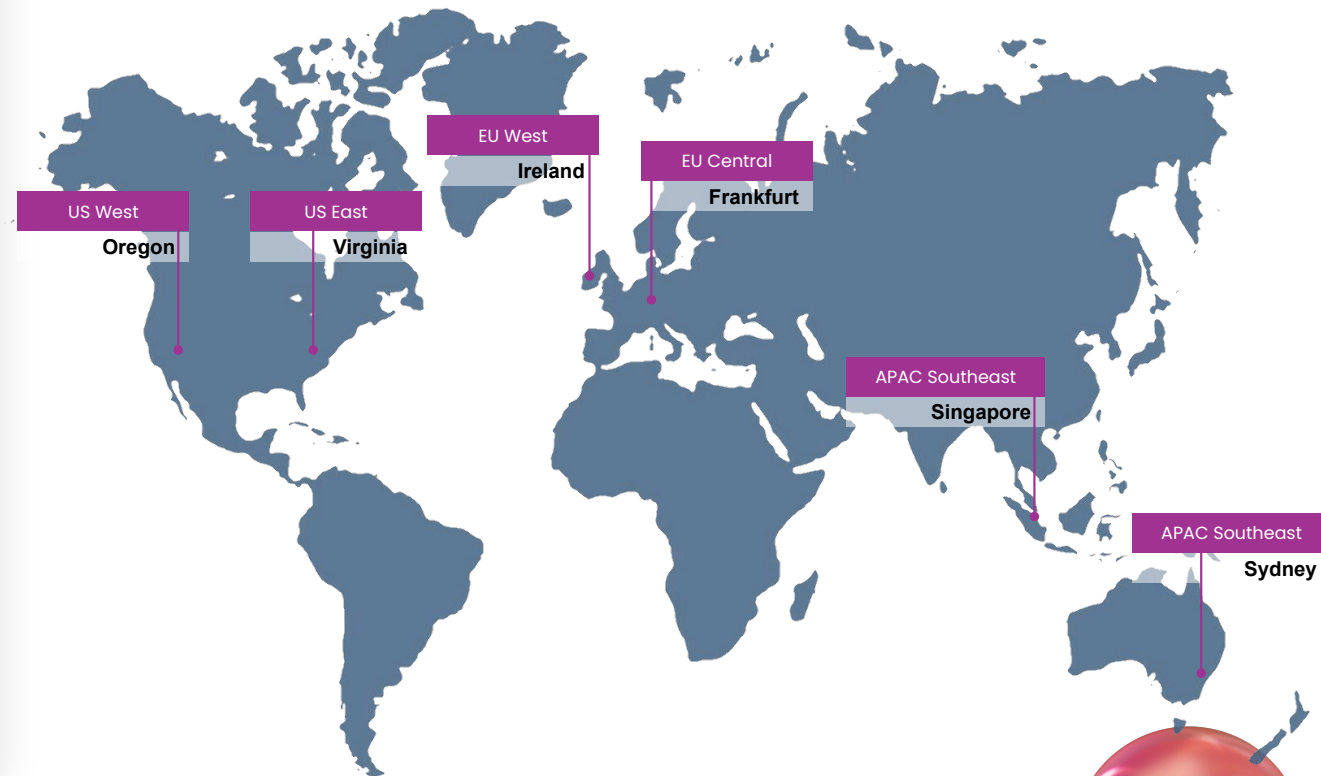

- Six globally distributed regions — including Sydney and Singapore, on a single SaaS code base
- Multiple availability-zone architecture with cross-regional failover for high availability
- Elastic SaaS infrastructure scales automatically to any volume — zero provisioning, zero operational overhead
- Localized caching delivers faster response times and reduces backend resource load

**Hundreds of Billions**

Transactions processed globally, every year

**20%**

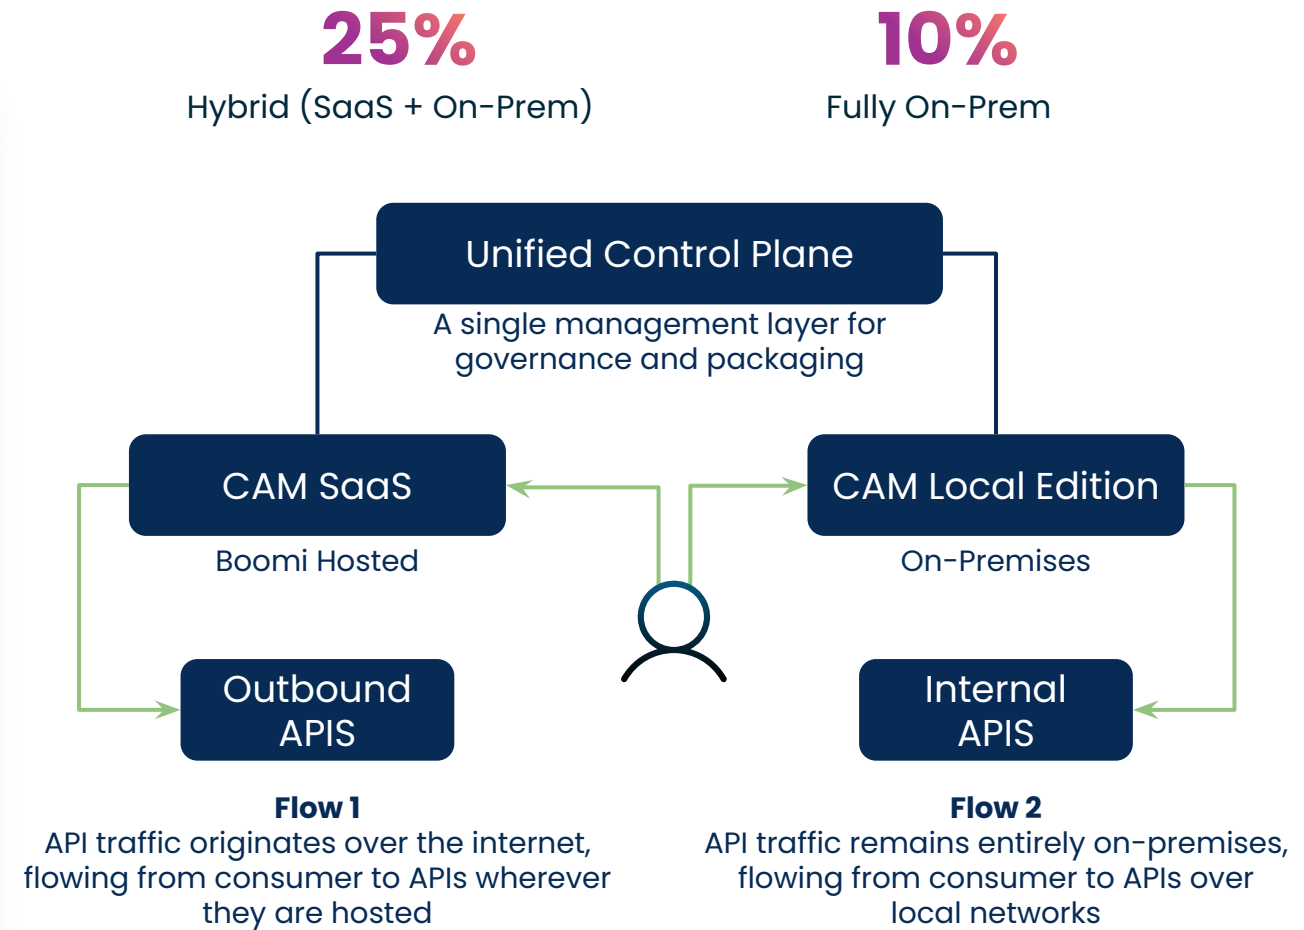

Of Transactions in APJ

# Hybrid and On-Premises Deployment Models

## Benefits

- SaaS, Hybrid, or fully On-Premises
- Secure sensitive workloads on-prem while managing partner, and customer facing APIs through the cloud
- Keep regulated traffic fully within your jurisdiction while maintaining unified governance and visibility through the Control Plane
- Cloud provider agnostic — run Local Edition on any K8s infrastructure, from private data centers to any public cloud, without lock in or bias

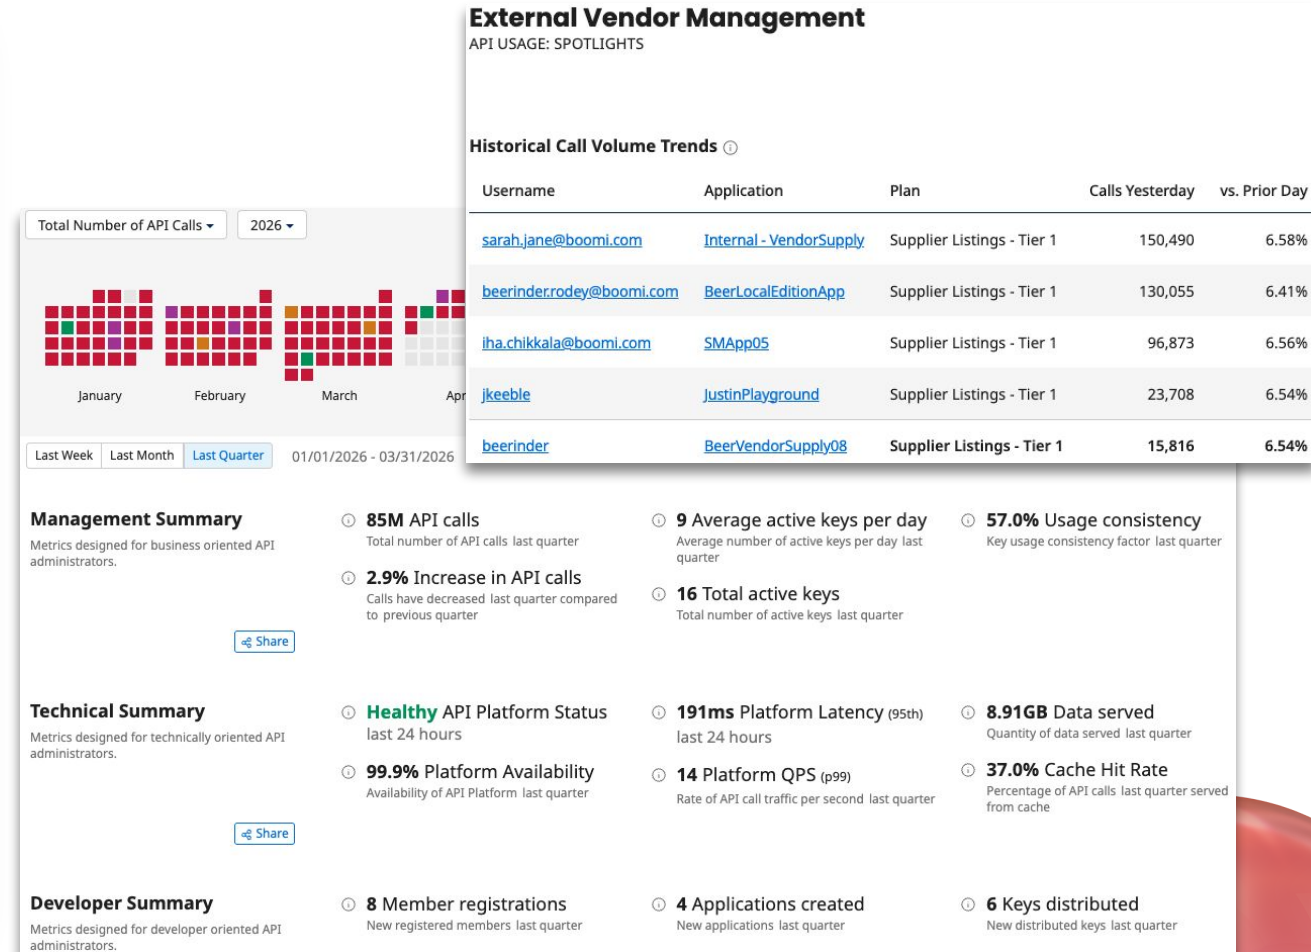

# Business and Operational Insights

## Benefits

- As API programs expand, insights across business and operations teams become a first-class requirement – not a nice to have
- Different stakeholders need different altitudes – from executive summaries and business KPIs down to individual call-level diagnostics
- Without consistent, real-time visibility, shadow APIs grow, underperforming products go unnoticed, and problems can grow into business impacting events

# Boomi API Management

## Frictionless Governance & Operational Scale

### API Lifecycle Acceleration

- AI-assisted early lifecycle management
- Low-code API implementation
- Seamless management and governance

### Operations and Insights

- Flexible controls for persona-based administration
- Global deployment flexibility and scaling
- Business and Operational Insights

### AI at Enterprise Scale

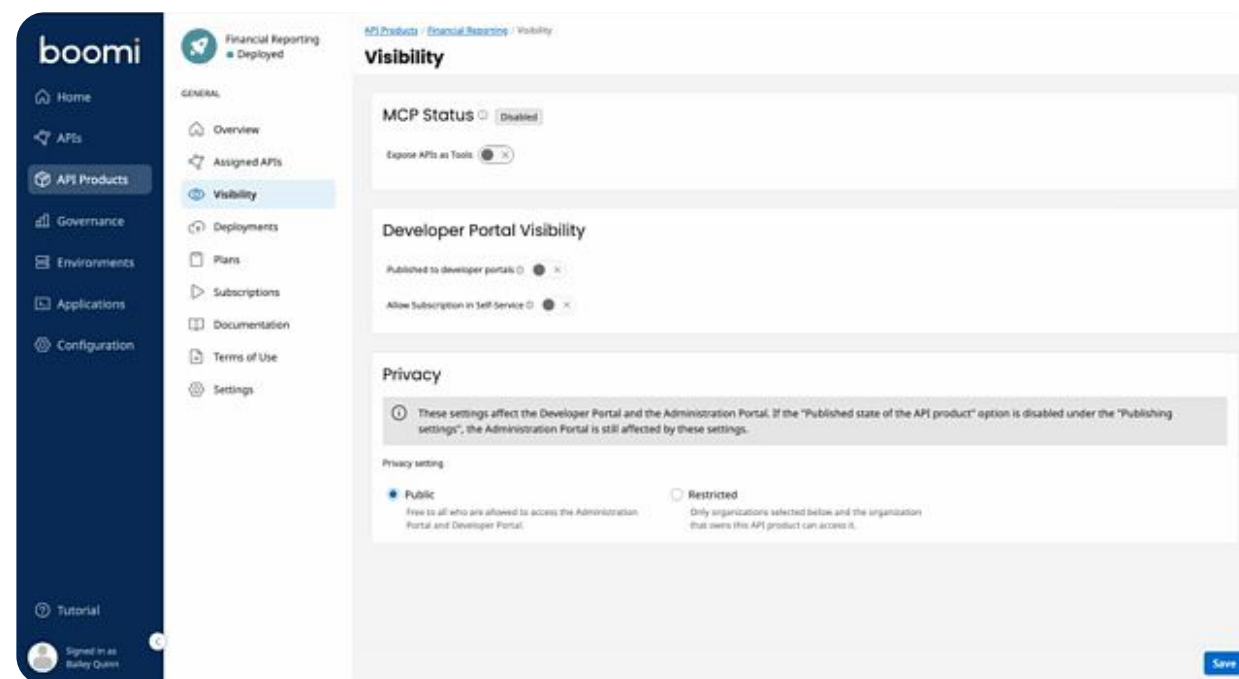

- Create AI tools from your enterprise assets
  - Catalog and govern native and MCP-enabled tools
  - Design and execute agentic workflows
- 

# Maximize tool value for greater agentic impact

## Benefits

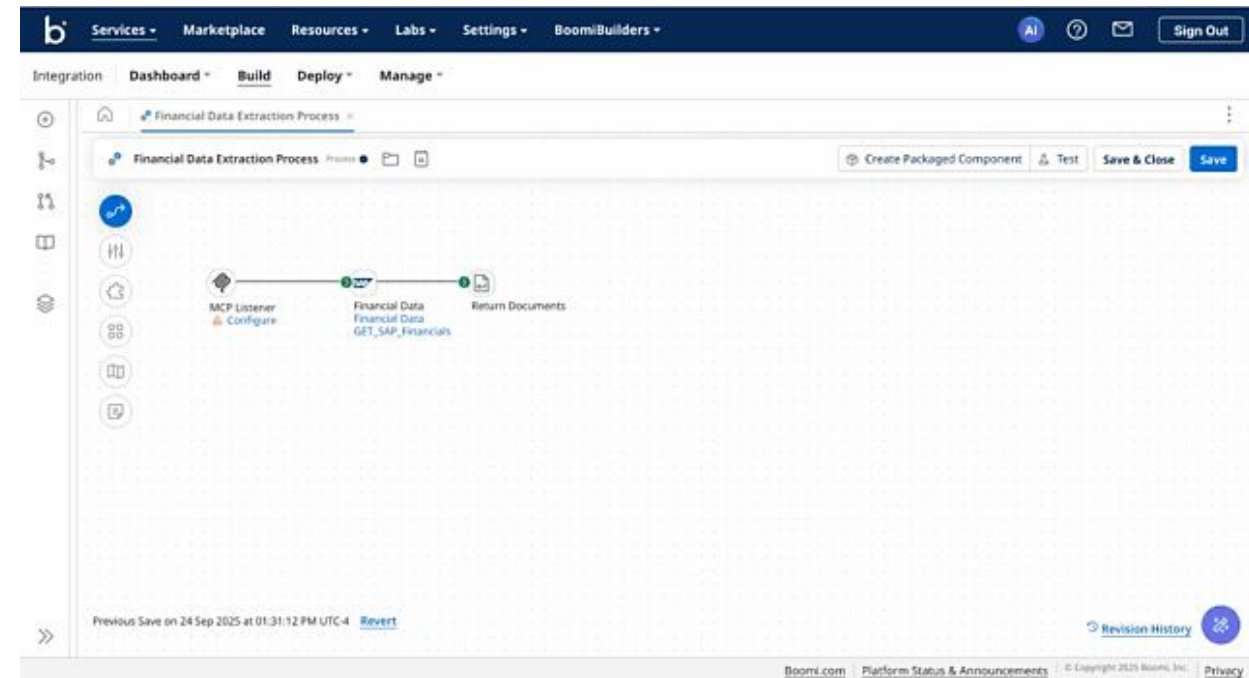

- Package assets around use cases to prevent agent bloat and custom builds
- Turn integrations and APIs into reusable assets that agents can leverage across multiple workflows
- Provide agents with the right data and tools at the right time, driving efficiency and ROI

# Turn enterprise assets into secure MCP-ready tools

## Benefits

- Expose APIs and integrations as MCP tools with built-in governance and control
- Enable agent access across legacy, cloud-native, and third-party tools with speed and flexibility
- Transform enterprise systems into MCP tools via 1,500+ pre-built connectors, cutting dev time

# MCP Registry

## Benefits

- Centralized governance for MCP servers across the Boomi platform
- Aggregate MCP servers from Boomi assets, external registries, and third-party sources into a single catalog
- Zero-configuration publishing for Boomi-built MCP servers
- Simple tool selection in Agent Designer
- Publish registry externally for consumption by third-party agent frameworks

The image displays two screenshots of the API Control Plane MCP Registry interface. The top screenshot shows the main MCP Registry page with a search bar and a list of MCP servers. The bottom screenshot shows the configuration page for a specific MCP server, 'mcp-server-memory', with a sidebar menu and a list of MCP servers.

**API Control Plane MCP Registry**

Search for servers by name Filter Sort: Newest - Oldest

- mcp-server-fetch v1.0.1** (Active) - 112 Tools: Converts URL content into Markdown, allowing the AI to ingest and process web page data in real-time.
- mcp-server-filesystem v1.2.1** (Active) - 314 Tools: Provides access to the local file system to read, write, and organize documents within authorized directories.
- XML Extractor v1.0.1** (Active) - 82 Tools: Parses and extracts specific data fields from complex XML files into structured formats for AI processing.

Search for MCP Servers by name

Show only latest version

- mcp-server-filesystem v1.2.1** (Active) - Maintains a knowledge graph that stores and retrieves user facts and context across separate chat sessions.
- mcp-server-filesystem v1.0.1** (Active) - Maintains a knowledge graph that stores and retrieves user facts and context across separate chat sessions.
- mcp-server-fetch v1.0.1** (Active) - Maintains a knowledge graph that stores and retrieves user facts and context across separate chat sessions.

**mcp-server-memory v1.0.1**

Overview Tools

The mcp-server-memory enables persistent, graph-based storage for maintaining context across different sessions. It allows you to save facts, entities, and relationships in a structured way so they can be retrieved later. It is ideal for users who need to track project details over time or build a cumulative knowledge base without repeating information in every new chat.

# Why leading companies choose Boomi

Trusted Enterprise Leader

## A Leader Across Markets

Rated a leader across analyst firms including Gartner, Forrester, and IDC – spanning iPaaS, APIM, data integration, and more.

## Complete Lifecycle Management

A unified platform for designing, orchestrating, and governing Boomi and third-party APIs, tools, and agents.

## Unique Runtime Architecture

Decoupled design and runtime keep logic in your region or behind your firewall.

## Proven Enterprise Scalability

Scales with world's most complex organizations, managing 300M+ integrations and billions of API calls without performance degradation.

## Largest Agnostic Vendor

The trusted choice of 30K+ organizations worldwide, more than any other agnostic integration and data management vendor.

## Flexible Breadth & Depth

Start anywhere and expand with confidence into data integration, automation, and AI agents using best-of-breed capabilities.

Thank you
